Overall Progress Narrative:

QPR Q2 2014: 04/1/2014 – 06/30/2014

To date disbursements total $1,378,477,191.53 which is 44.3% of total budgeted. Disbursements during the quarter total $100,386,762.04. Total reported expenditures exceeded disbursements by ($12,598,675.71) due to voucher adjustments posted after the Q2 Action Plan was submitted for approval. These voucher adjustments caused the disbursed amounts to change in DRGR, a feature that was unknown to the team at the time the adjustments were being made. These expenditures will be corrected in Q3. Also, we will continue voucher adjustments to identify expenditures as we split activities per HUD requirements. This project will continue into Q3. The housing and infrastructure activities are as follows:

HOUSING ACTIVITIES:

We continued our technical guidance, grant troubleshooting and outreach for the Homeowner Opportunity Program (HOP). There has been a 10% opt in rate by HOP eligible applicants for some of the more mature regions. Applicants who have chosen to opt out are choosing to do so mostly because they do not want to leave their hurricane damaged property (41% of those surveyed stated this reason). A total of 1,931 mobility counseling sessions have been conducted and 48 realtor assignments were made. To date, HOP has closed on 10 single family homes and we have 187 applicants actively looking for homes in higher opportunity neighborhoods.
The Homeowner Assistance Program (HAP) continues to move forward as planned.
On the Affordable Rental Housing side, the GLO has committed to spend $342,521,992 and has awarded $469,451,898.74. To date we have disbursed $134,796,561.54.

INFRASTRUCTURE ACTIVITIES:
The infrastructure team has focused on several key areas, as outlined below:
Developed strategies to ensure timely and efficient completion of Round 1 grants. Began development of strategies to aggressively expedite Round 2.1 and 2.2 grants while delivering beneficial and productive projects across the effected area.
Continued and enhanced collaboration with Quality Assurance to enhance and improve vertical Program Monitoring and Customer Service for grantees.
Continued working with communities to make certain that all feasible efforts are being made to support and document efforts to Affirmatively Further Fair Housing.
Further advanced the Texas Recovery System (T-RecS) for tracking grantee Section 3 compliance and draw requests. This enables improved capture of data to assist with our reporting and submissions requirements.

Contractor shall install 10,600 square yards of 8 inch base, 11,000 square yards of 2 inch hot mix asphalt concrete, 1,314 linear feet of 18 inch diameter and 2,090 linear feet of 24 inch diameter reinforced concrete pipe culverts, and grade approximately 13,150 linear feet of roadside drainage ditches. Construction shall take place at the following locations: Scenic Drive from FM 517 to Gum Drive; Grand Blvd from FM 517 to Scenic Drive; Island Drive from Scenic Drive to East end of street; Bruce Drive from Scenic Drive to Gum Drive; and Gum Drive from FM 517 to East end of street. Improvements will increase capacity fo the storm drainage system and reduce future flooding. DREF: Category C Portion Residential: Dickinson has 3000 residential properties and 274 non-residential property as defined by parcel data provided by appraisal district and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9163 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .86

DREF: Category C Portion Residential: Edcouch has 348 residential properties and 18 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9510 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .88

Halls Bayou Regional Detention Project, Bretshire Basin: Contractor shall address flooding by building a regional detention basin to detain flood overflow waters from the bayou. Contractor shall excavate 1,000,000 cubic yards of soil to construct the detention basin north of Parker street, west of Jensen

Street, south of Langley Street, and east of SHady Lane in North Houston. The construction of the detention basin will reduce peak flow waters from the bayou and reduce base flood elevations. Tidwell Drainage Improvement Project: Contractor shall address the failure of the existing storm sewer system by increasing the exisiting capacity by installing 2,441 linear feet of 24 inch, 54 inch, and 84 inch storm sewer and related appurtenances; approximately 3,116 linear feet of box culverts and related appurtenances;21 manholes; 423 linear feet of 6 inch, 8 inch, and 12 inch sewer line, and related appurtenances; and shall install 11,854 square yards of pavement and related roadway work. (No square yards measurement available to report for public improvements under proposed accomplishments.) Construction shall take place in the glen Oaks Community on Tidwell Road from Airline Drive to McGallion Road. Improvements will allow grfetaer volumes of water into the storm drain system, thereby mitigating flooding in the drainage basin. Yale Drainage Improvement Project: Contractor shall address the failure of the exsisting storm sewer system by increasing the existing capacity by removing 3,493 linear feet of 3 inch to 78 inch storm sewer and installing 2,638 linear feet of 24 inch to 78 inch storm sewer and related appurtenances. Install 4,035 linear feet of boxs culverts and related appurtenances and 42 manholes. Construction shall take place on Yale Street from Tidwell Road to Parker Road. Improvements will increase the capacity of the storm drain system therby reducing flooding in the drainage basin.

DREF: Category C Portion Residential: Houston has 34,275 residential properties and 2,676 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9276 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 14 percent and the risk-reducing expansion was 86 percent. Combined Ratio: .89

Activity Description:

Contractor shall install approximately five hundred thirty-three linear feet (533 l.f.) of eighteen inch (18 in.) diameter storm sewer pipe, 2 fiberglass manholes, 1 Type "C-C" inlet, and related appurtenances. Construction shall take place on Alamo Avenue from 5th Street South to 6th Street, and on Alley East of Cottonwood Avenue from 5th Street to the existing drainage ditch adjacent to abandoned railroad track. Improvements will increase the capacity of the storm drainage system, reduce future flooding and will address a failure to function caused by Hurricane Dolly.

DREF: Category C Portion Residential: La Villa has 158 residential properties and 6 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9634 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .88

DREF: Category C Portion Residential: McAllen has 1,011 residential properties and 195 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .8383 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 70 percent. It was determined that the percent of improvement corresponding to base reconstruction was 30 percent and the risk-reducing expansion was 70 percent. Combined Ratio: .77

DREF: Category C Portion Residential: Old River-Winfree has 535 residential properties and 0 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of 1.0 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .90

DREF: Category C Portion Residential: Palmhurst has 15 residential properties and .4 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9740 residential

benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 90 percent. It was determined that the percent of improvement corresponding to base reconstruction was 10 percent and the risk-reducing expansion was 90 percent. Combined Ratio: .94

DREF: Category C Portion Residential: Sullivan City has 723 residential properties and 1 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9986 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was 100 percent. Combined Ratio: 1.0

DREF: Category C Portion Residential: Woodville has 206 residential properties and 26 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .8879 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .84

DREF: Category C Portion Residential: Nassau Bay has 1,446 residential properties and 52 non-residential property as defined by parcel data provided by appraisal district and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9653 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .88
