## Narratives

### Disaster Damage:

According to Governor Perry's Texas Rebounds Report November 2008, the 2008 hurricane season will go down in history as having been particularly unkind to Texas. The State was impacted by Hurricanes Ike, Gustav, and Dolly and a significant tropical storm within a 52 day time frame. Hurricane Ike, the most damaging, was enormous, 900 miles wide, and the size of West Virginia. As it rolled across the Gulf of Mexico, Ike grew from a Category 2 storm to a powerful Category 4 that unleashed a 20-foot storm surge that engulfed Galveston and other coastal areas, proving to be the third-most destructive storm to hit the United States. Hurricane Dolly, although less damaging only in absolute terms, had already struck the south Texas coastline as a Category 2 hurricane. It was the most destructive storm to hit the Rio Grande valley in over four decades.

Preliminary unreimbursed damage estimates for the 2008 hurricane season total more than \$29.4 billion. Of this amount, almost \$22.9 billion in non-housing related damages have been identified as well as \$3.4 billion of housing assistance needs. Homes, businesses, and infrastructure were damaged and destroyed. Physical structures may be replaced and rebuilt, but harder to address are the effects the disasters of 2008 have had on the thousands of Texans whose neighborhoods, communities, places of employment and daily lives have been fundamentally altered. The many facets of what makes a place a community, and not just a geographic location, must be repaired, restored, and rebuilt. This requires not only the strength of these communities as they rebuild individually, but the strength of our State to unify these communities as they rebuild Texas.

The Texas Rebounds Report also estimates over \$1.1 billion in losses to the forestry, agricultural, and fishery industries. Over 473,000 acres of timber were affected, agricultural fields were destroyed by salt contamination, and barns and barbed-wire fences were destroyed, thereby affecting the availability and suitability of grazing lands, with an estimated 15,000 head of livestock killed. The report details damages to area crops and recreational and commercial fisheries. Instances where large-scale damage necessitates a massive or multi-faceted recovery process with a long recovery period, such as the devastation of an entire area, the immediate need of safe and sanitary housing on a significant scale, the decimation of an industry, medical facilities, or the destruction of a major public infrastructure system, are scenarios in which the urgent need of such a situation shall be considered.

Texas is making the most of state and federal funds, and has received notice that the U.S. Department of Housing and Urban Development (HUD) will provide \$1,314,990,193 in disaster recovery supplemental funds from the Community Development Block Grant (CDBG) Program as a primary source of funding that is available for public infrastructure, economic development, and housing. The Action Plan for recovery encourages atriangular approach to disaster recovery – public infrastructure, economic development, and housing- with each piece critical to the recovery effort.

### Recovery Needs:

Action Plan Amendment #4 contained a detailed budget accounting for \$37,481,416 in DREF funds to specific categories for administration, planning and program activities, for a total allocation of \$3,113,472,856 when added to previously awarded amounts program-wide. The Amendment also stratified the administration and planning dollars by Round (1 and 2) and between housing and non-housing. This was done in part to ensure the 55% housing and 45% non-housing allocations, as stipulated by the Conciliation Agreement, were maintained across two agencies - Texas Department of Housing and Community Affairs (TDHCA) and Texas Department of Rural Affairs (TDRA).

Now that the housing and non-housing programs are under one agency and in order to create a more efficient internal accounting mechanism, Amendment #5 will allow the Disaster Recovery (DR) Program to:

- Combine the administrative dollars into one allocation, eliminating the distinction between housing and non-housing and between Rounds 1 and 2 (see Tables 1 and 2).
- Combine the planning dollars into one allocation, eliminating the distinction between housing and non-housing and between Rounds 1 and 2.

- Allow for the utilization of administration and planning dollars to supplement existing allocations in accordance with GLO policies.
  - Allow for transfer of program dollars between Rounds 1 and 2, maintaining the distinction between housing and non-housing, for budgeting and planning purposes.
  - Also, in order to facilitate the creation of an economic development and other programs which may generate program income locally, the GLO is affirming that program income is governed by the waiver in the Federal Register, Volume 74, No. 29, February 13, 2009 and may be retained by the grantees for economic development and other activities within program guidelines.
  - Because the Action Plan appears to restrict eligible grantees to cities and counties, Amendment #5 will allow public universities and other non-profit entities, as identified in the MODs, to be grantees for non-housing and housing activities.
- Finally, in order to maintain maximum flexibility for the use of funds and to allow for innovation and efficiency in the construction of affordable rental units, Amendment #5 will allow for construction of either single or multi-family rental units as long as the affordable rental requirement for each region is maintained. The Amendment will also allow the GLO to waive the \$10,000,000 cap for multifamily project-based applications as well as the \$20,000,000 cap per Developer/Applicant for applications related to public housing.

Improvements will increase capacity for the storm drainage system and reduce future flooding. DREF: Category C Portion Residential: Dickinson has 3000 residential properties and 274 non-residential property as defined by parcel data provided by appraisal district and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9163 residential benefit. The term "residential properties," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .86

**Activity Description:**

Contractor shall install approximately five hundred thirty-three linear feet (533 l.f.) of eighteen inch (18 in.) diameter storm sewer pipe, 2 fiberglass manholes, 1 Type "C-C" inlet, and related appurtenances. Construction shall take place on Alamo Avenue from 5th Street South to 6th Street, and on Alley East of Cottonwood Avenue from 5th Street to the existing drainage ditch adjacent to abandoned railroad track. Improvements will increase the capacity of the storm drainage system, reduce future flooding and will address a failure to function caused by Hurricane Dolly.

DREF: Category C Portion Residential: La Villa has 158 residential properties and 6 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9634 residential benefit. The term "residential properties," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .88

DREF: Category C Portion Residential: McAllen has 1,011 residential properties and 195 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .8383 residential benefit. The term "residential properties," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 70 percent. It was determined that the percent of improvement corresponding to base reconstruction was 30 percent and the risk-reducing expansion was 70 percent. Combined Ratio: .77

Contractor shall excavate approximately sixteen thousand two hundred twenty four cubic yards (16,224 c.y.) of material, construct a lined ditch and install 160 ft. of 6 ft. chain link fence along the perimeter of ditch. Construction shall take place at the flood plain approximately five hundred fifty feet (550 ft.) south of US Expressway 83 and east of Olga Street. Improvements will address a failure to function caused by Hurricane Dolly.

DREF: Category C Portion Residential: Sullivan City has 723 residential properties and 1 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9986 residential benefit. The term "residential properties," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was 100 percent. Combined Ratio: 1.0

**Activity Description:**

Contractor shall perform channel improvements to the Coon Marsh Gully to include ditch cleaning and re-grading (widening); new culverts with wing walls at Bonura Road in Country Wood; wing walls and concrete lining of the sides and bottom of the Pinewood Boulevard bridge over Coon Marsh Gulley; two (2) pedestrian creek crossings across Coon Marsh Gulley (replacement of existing crossings per design requirements), provide other associated appurtenances; and perform site work associated with construction. In preparation of Compensatory Mitigation for required Section 404 and pre-application meeting with USACE, it was determined that a Compensatory Mitigation Plan would not be feasible due to excessive cost which is estimated to be \$2,000,000 for Coon Marsh Gully alone; therefore, in agreement with USACE recommendation the project will be scoped as an Avoidance and Minimization Plan. Grantee shall also acquire any additional easements or rights-of-way necessary for the proposed Coon Marsh Gully Improvements. Proposed improvements will ensure proper conveyance of storm water, significantly increase the capacity of the channel, and reduce flooding. Improvements shall address direct damage and a failure to function caused by Hurricane Ike. (DREF Eligibility: Category C - Individual Mitigation Measure)

**Location Description:**

Construction shall take place on Coon Marsh Gulley from Bonura Road to Pinewood Boulevard and on Coon Marsh Gulley at the Diversion Channel from Pinewood Blvd to Little Pine Island Bayou in Hardin County, Texas.
