Contractor shall address the flooding by constructing a regional detention basin to detain flood overflow waters from the bayou. Contractor shall excavate approximately one million cubic yards (1,000,000 c.y.) of soil to construct the detention basin north of Parker Street, west of Jensen Street, south of Langley Street, and east of Shady Lane in North Houston. Improvements will address a failure to function caused by Hurricane Ike. DREF: Category C Portion Residential: Houston has 34,275 residential properties and 2,676 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9276 residential benefit. The term residential properties for this purpose may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or non-existent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 14 percent and the risk-reducing expansion was 86 percent. Combined Ratio: .89

DREF: Category C Portion Residential: Willacy County has 1,946 residential properties and 98 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9521 residential benefit. The term "residential properties," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .88

DREF: Category C Portion Residential: Pasadena has 11,856 residential properties and 970 non-residential property as defined by parcel data provided by appraisal district and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9244 residential benefit. The term "residential properties," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract

performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .86
