

# HUD'S LMI REQUIREMENT FOR INFRASTRUCTURE PROJECTS

## EXAMPLE:

**\$500,000**

**LMI**

**\$200,000**

**LMI**

**\$300,000**

**Urgent Need (UN)**

If at least 51% of the households benefitting are LMI, then the total cost of the project counts toward HUD's 70% LMI requirement.

$$\frac{\$700,000 \text{ (total cost of projects meeting LMI requirement)}}{\$1,000,000 \text{ (total allocation)}} = 70\%$$

At least 51% of the households in the areas benefitting from the drainage and road projects are LMI. These two projects total \$700,000 of the \$1 million allocation. Therefore, the plan for these three infrastructure projects meets HUD's 70% LMI requirement.

**TOTAL ALLOCATION:  
\$1,000,000**

**How infrastructure project plans meet HUD's 70% LMI requirement.**
