

THINGS TO KNOW AFTER AN EVACUATION

BE PREPARED THIS HURRICANE SEASON

CHECK WITH LOCAL OFFICIALS.

If you've evacuated for the storm, be sure to check with local officials on where you are staying and back home before you begin traveling.

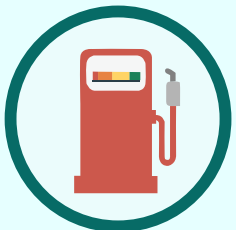

BE PREPARED WHEN RETURNING.

Residents returning to disaster-affected areas after significant events should expect and prepare for disruptions to daily activities, and remember that returning home before storm debris is cleared is dangerous.

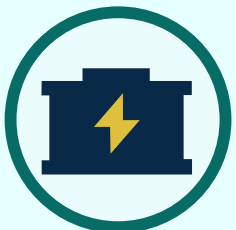

CHARGE UP.

Charge up your devices and consider getting back up batteries in case a power outage happens again.

FILL UP.

Fill up your gas tank and consider downloading a fuel app to check for outages along your route. Avoid downed power or utility lines; they may be live with deadly voltage.

USE GENERATORS NOT AT YOUR HOME.

Only use generators away from your home and NEVER run a generator inside a home or garage, or connect it to your home's electrical system.
