**Narratives**

**Disaster Damage:**
According to Governor Perry's Texas Rebounds Report November 2008, the 2008 hurricane season will go down in history as having been particularly unkind to Texas. The State was impacted by Hurricanes Ike and Dolly and a significant tropical storm within a 52 day time frame. Hurricane Ike, the most damaging, was enormous, 900 miles wide, and the size of West Virginia. As it rolled across the Gulf of Mexico, Ike grew from a Category 2 storm to a powerful Category 4 that unleashed a 20-foot storm surge that engulfed Galveston and other coastal areas, proving to be the third-most destructive storm to hit the United States. Hurricane Dolly, although less damaging only in absolute terms, had already struck the south Texas coastline as a Category 2 hurricane. It was the most destructive storm to hit the Rio Grande valley in over four decades. ELIGIBLE COUNTIES: Hurricane Dolly (FEMA-1780-DR) and Hurricane Ike (FEMA-1791-DR) Anderson, Angelina, Aransas, Austin, Bowie, Brazoria, Brazos, Brooks, Burleson, Calhoun, Cameron, Cass, Chambers, Cherokee, Fort Bend, Galveston, Gregg, Grimes, Hardin, Harris, Harrison, Hidalgo, Houston, Jasper, Jefferson, Jim Hogg, Jim Wells, Kenedy, Kleberg, Leon, Liberty, Madison, Marion, Matagorda, Milam, Montgomery, Morris, Nacogdoches, Newton, Nueces, Orange, Panola, Polk, Refugio, Robertson, Rusk, Sabine, San Augustine, San Jacinto, San Patricio, Shelby, Smith, Starr, Trinity, Tyler, Upshur, Victoria, Walker, Waller, Washington, Wharton, Willacy.

**Recovery Needs:**
On November 28, 2008, HUD made an initial one-third allocation to Texas for $1,314,990,193 in disaster recovery supplemental funds from the Community Development Block Grants (CDBG) Program for public infrastructure, economic development, and housing needs as a result of natural disasters that occurred in 2008 in the State of Texas, namely Hurricanes Dolly and Ike. These funds will be allocated among 11 regions in the affected areas of the state based upon FEMA damage assessments as of December 1, 2008 under the following activities:

- Housing $622,752,828 47.36%
- Non-Housing Infrastructure $587,328,615 44.66%
- Economic Development $2,600,000 0.20%
- Planning $36,559,240 2.78%
- State Administration $65,749,510 5.00%

Housing Activities will be managed by the Texas Department of Housing and Community Affairs (TDHCA), while Non-Housing Infrastructure, Economic Development and Planning Activities will be managed by the Office of Rural Community Affairs (ORCA). Project identification and funding amounts for eligible activities will be determined by local leaders through regionally developed Methods of Distribution. Grants will be awarded for two year periods beginning in mid 2009.

**Demonstration of Projected Unmet Needs**
The State of Texas, following the extraordinarily difficult 2008 hurricane season, prepared the Texas Rebounds report to estimate the financial impact of Hurricanes Dolly and Ike. This report broke the financial needs to achieve complete recovery into several categories. The report indicates a total of $29.4 billion is needed to meet the needs presented by Hurricanes Dolly and Ike. To date, the State of Texas has been allocated only $3.1 billion in CDBG disaster recovery funds and in combination with FEMA funds, SBA efforts, and other assistance, still does not fulfill the financial needs to achieve long-term sustainable and resilient recovery. The findings of this are summarized in Table 3 of the State of Texas Plan for Disaster Recovery &ndash Amendment No. 1.

Eligibility of infrastructure activities was determined using various methodologies that utilized appraisal district information, the US Geological Survey (USGS) National Land cover Database 2001, and grant application project descriptions and engineering estimates. Pro-rata determinations for DREF eligibility were then based on residential benefit as determined via base data on residential properties (which includes parcels, acres, and/or structures) and proportionate benefit of risk-reducing expansion above and beyond baseline reconstruction. The methodology explanations may be obtained by contacting the Texas Department of Rural Affairs (TDRA).

Overall Progress Narrative:

**NON-HOUSING (INFRASTRUCTURE):**

ACTION PLAN AND DISASTER RECOVERY ENHANCEMENT FUND:
Effective March 1, 2011 TDRA expanded the services of its program management company (PMC) to provide full oversight, technical assistance and contract management of TDRA Disaster Recovery (DR). Ten DR Full Time Employees remained with TDRA to provide financial controls, quality assurance, and oversight of the PMC contract and for intergovernmental relations with all TDRA grantees. Ten TDRA DR staff members joined the PMC Team, allowing vital DR institutional knowledge to be maintained and many grantees will continue to work with the same DR staff that they were familiar with under the previous structure.
The Hurricanes Dolly/Ike Action Plan Amendment No. 3 related to the Disaster Recovery Enhancement Funding
(DREF) totaling $55,481,416 for the State of Texas, allocates 68% ($37,481,416) for non-housing activities and 32% ($18,000,000) for housing activities. This is based on a pro-rata distribution formula. During the month of March, TDRA Disaster Recovery team members finalized the latest Action Plan Amendment for submission to HUD. The revised Action Plan Amendment No. 3 was submitted to HUD on March 4, 2011 for review and approval.

Awards & Contracts Round I (As of 03-22-11):
Infrastructure Awards - TDRA has awarded $591,232,326 (100%) to 230 communities. All eligible applications have been awarded.

Environmental - There have been 225 executed work orders (1672 sites), 15 self-performing work orders (399 sites), 507 submitted ERRs (1776 sites) and 441 certified ERRs (1613 sites). Environmental review for 72% of sites are complete.

Engineering - To date there have been 238 executed work orders (1463 sites), 31 Self-Performing work orders (514 sites), 484 submitted bid packages (1728 sites) and 387 accepted bid packages (1342 sites). Final plans have been accepted for 60% of sites.

Construction - Construction contracts are anticipated for 2,227 individual construction sites. To date, 331 have cleared engineering and environmental (1129 Sites), 257 are advancing bid packages (958 Sites), 236 have had bid openings (929 Sites) and 234 have awarded bid packages (923). 41% of Sites have been awarded. 145 awards have started construction (433 Sites), 72 awards have completed construction (166 Sites) or 5% of all Sites.

Economic Development
• Deep East Texas Council of Government (DETCOG) - DETCOG originated one loan application amounting to 24.9% of available funding and continues to seek applications for additional loans. TDRA staff is currently providing technical assistance as DETCOG reviews potential new loan applications.
• City of Galveston &ndash The City of Galveston has continued work on finalizing its economic development program to assist Galveston businesses impacted by Hurricane Ike. TDRA Staff met with the City of Galveston on February 8 and February 22, 2011, and provided them with technical assistance. The city has provided documentation listing businesses and entities interested in participating in the program and have also provided draft guidelines for loan program participants.
• South Eastexas Regional Planning Commission (SETPRC) - SETRPC staff is continuing to work off the current ranking list to determine eligible entities for the remaining economic development loan assistance funds. SETRPC has originated 97 loan applications for 94.18% of available funding.

Round II Applications (As of 03-22-11):
Applications
• Dolly/Ike Round II, Phase 1 Pool Funding &ndash TDRA received 35 Pool applications totaling $20,229,098. The total amount available under Phase 1 is $6,558,089, leaving $13,671,009 in unmet need. All top scoring applications have been forwarded to the fair housing complainants and all but one has been cleared for award. Upon completion of their review the scores will be posted and made available.
• Dolly/Ike Round II, Phase 1 Partial MOD Funding &ndash TDRA received 41 COG Partial MOD applications totaling $189,766,499.20. This leaves a balance of $81,990,051.80 of funds that were allocated but not applied for in the Partial MOD application process. Of the 43 applications forwarded for review to the fair housing complainants, 18 have been unconditionally approved. The others remain under review. Nine applications are subject to additional requests for information by the fair housing complainants. Five applications have been disqualified as they did not meet TDRA program minimum eligibility requirements.

Methods of Distribution (MODs) - All four Round II, Phase 1 Partial Methods of Distribution were submitted to HUD on November 22, 2011. Responses to HUD&rsquo;s comments were submitted and the MODs were approved in March.

OVERALL ACTIVITIES:
HUD Activities - HUD staff performed a monitoring visit on January 10th and 11th to review grantee contract files. Due to the amount and complexity of materials involved, HUD staff returned on April 4-8 to conduct a monitoring visit and complete their review.

HOUSING:
During the reporting period (January 1 &ndash March 31 2011), the Texas Department of Housing and Community Affairs (TDHCA) underwent a re-organization of its Disaster Recovery Division in an effort to provide Texas Communities affected by Hurricane Ike with expanded technical assistance to allow them to move forward.
aggressively with their Ike/Dolly programs and to ensure that their programs are fully compliant with federal guidelines and other requirements.

As part of the restructuring, the TDHCA Disaster Recovery Division is divided into 5 key areas: Programs (Rental and Non-Rental); Budget and Policy; Communication; Construction; and Compliance & Quality Control.

The Program area will provide technical assistance and consultation to Sub-recipients both in rental and non-rental activities. As Round 2 activities begin, this area will be integral in guiding Sub-recipients’ compliance under the Conciliation Agreement and new Analysis of Impediments (AI) and program implementation.

The Budget and Policy area will oversee draws and set ups for the Division draft amendments to contracts, provide all DRGR reporting for the division, and provide support to TDRA DRGR reporting. The staff will approve Sub-recipients’ draw requests and review all set ups to appra a the contract system.

The Communication area produces reports and presentations for the public and elected officials. They also oversee all of the constituent complaints received by the division. They will chart program production and expenditures.

The Construction area will oversee and provide technical assistance to Sub-recipients for environmental reviews, accessibility, and code related construction issues. This area will also perform all environmental clearances and conduct quality and accessibility inspections of single family homes and multifamily developments.

The Compliance and Quality Control area will provide oversight assistance entailing verifying key controls are in place to address identified risks as well as emerging risks based on program progression. Compliance oversight is conducted to ensure Sub-recipients are following rules, regulations, and guidelines. Quality Control work is performed on internal division functions to ensure management controls are operating as intended.

Programs: Program Staff made technical assistance visits and encouraged Sub-recipients to “ramp-up” quickly by submitting as many Set-ups and Draws as possible.

Budget and Policy: There were 5 new hires in the Budget and Policy area. Staff was brought in to assist with the “ramp up” of draws and set ups by the Sub-recipients. Staff approved eligibility on 405 single family home set ups for rehabilitation and/or reconstruction.

Expenditures for Multi-family projects during the reporting period totaled $9,880,673.68, and expenditures for Single Family projects totaled $3,037,738.63. Administrative expenditures by both TDHCA and the Sub-recipients totaled $916,561.21. Total expenditures for 1st Quarter 2011 was $13,834,973.52.

Communication: In an effort to be as transparent and efficient as possible, the division regularly produces reports for internal use, for HUD, the Governor’s Office, members of the Texas Legislature, and the TDHCA Governing Board. To create the reports we use the information reported by Sub-recipients. During the 1st Quarter of 2011 the Pipeline report, which reports single family activities by sub-recipient, reported the following:

- 100 Applications were received by Sub-recipients
- 673 applications were determined Ineligible or withdrawn by the Sub-recipients
- 75 applications were determined eligible by Sub-recipients
- 302 Work Write Ups (bid package selections) were prepared by the Sub-recipients
- 859 environmental clearances were approved by TDHCA
- 859 applications were approved by TDHCA
- 58 projects (homes) under construction
- 336 applications were approved by TDHCA
- 336 environmental clearances were approved by TDHCA
- 58 projects (homes) under construction
- 64 projects (homes) have been completed and pending final closeout documentation

Construction: The first multifamily rental project was completed under the Ike/Dolly Round 1 program. Orange Navy Homes II, located in Orange, consists of 25 multifamily rental units created through a substantial rehabilitation of the former Kingston Apartments, as well as 11 new single-family rental homes located on scattered sites within the neighborhood. Construction was funded in large part through a $3.4 million disaster recovery award from TDHCA.

Compliance and Quality Control: Eligibility Monitoring Reviews were conducted on each of the 18 Ike/Dolly Sub-recipients. The objectives and scope of the review were to: 1) Validate the number of eligible applicants being reported monthly to the Department, 2) Review eligibility documents to ensure that support was present for each eligibility component for a sample of set-ups selected from the TDHCA Housing Contract System.

The Sub-recipients were asked to provide information to support eligibility on applicants reported as eligible to the Department. In addition, a sample of applicants was selected from the TDHCA Housing Contract System and tested to determine whether the six program eligibility components were supported with source documents and complied with each Sub-recipient’s Housing Guidelines.

Procurement reviews were performed on the City of Brownsville’s reconstruction program documents as well as South East Texas Regional Planning Commission (SETRPC) reconstruction procurement to ensure that the procurement processes appeared to have been conducted within established requirements.

### Activity Description:
Contractor shall install approximately 7,220 linear feet of reinforced concrete pipe ranging in size from 18 inches to 48 inches, install 7,220 linear feet of trench protection, 8 manholes, 1,700 linear feet of flexible pavement, 1 drainage outfall and other items. Contractor shall purchase six right of way easements needed for the installation of the new drainage system in the Sharyland subdivision. Construction shall take place along the route fo the planned drainage system beginning at the Sharyland Woods subdivision, then turn south on existing Glasscock Road right of way, turn west along the south boundary line (within easement) of the proposed Marin Herrera Subdivision, turn south along the east boundary line of the proposed Bosquencinos and Orchid Subdivisions, turn west through the south boundary line of the proposed Orchid and Lot 38-12 of the West Sharyland addition Subdivision and end at an existing caliche pit that will serve as a detention pond. These improvements will increase the capacity of the storm sewer and reduce flooding.

DREF: Category C  Portion Residential: City of Alton has 9 residential properties and 0 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of 1.0 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .90

Additional Project Detail:

Activity Description:

Contractor shall replace the existing flat built-up roof with a code rated standing seam metal roof, relocate the HVAC equipment and associated appurtenances, re-configure ductwork, harden the exterior doors against water intrusion, harden mounts and connections on all exposed utilities and security equipment, purchase and install approximately five hundred eighty-eight (588) solid-state light-emitting diode (LED) bulbs on container handling cranes and high mast lighting poles. Construction shall take place at the Harden C3 Amenities Building located at 1515 East Barbours Cut Boulevard in La Porte, Texas. Improvements will address direct damage caused by Hurricane Ike.

Additional Project Detail:

Project will replace high mast luminaries necessary for the safety and security of the shipping yard. The shipping container yard area is used to load and store shipping containers upon arrival and departing on vessels. Safety of the operation is highly dependent on visibility, particularly at night and necessities use of high-mast lighting to illuminate pathways of stacked containers. This project would replace the expensive, vibration-sensitive high pressure sodium and metal halide bulbs with solid-state LED replacements. During Hurricane Ike, the outside A/C compressor on C3 building blew off the roof damaging the roof and allowing water intrusion into the building. The need to harden the facility is necessary because relocation is not feasible. The project will replace the flat built-up roof with a standing seam metal roof, relocate the HVAC equipment, and re-configure the ductwork. Project would also include hardening doors against water intrusion, reinforcing mounts and connections on all exposed utilities and security equipment.

Due to high winds from Hurricane Ike, many of the lights on the high mast luminaries and cranes were damaged and the outside A/C compressor on the C3 building blew off the roof damaging the roof and allowing water intrusion into the building. These structures are a part of safety systems for Port workers who operate 24 hours operations and visitors. **Activity Description:**

Halls Bayou Regional Detention Project, Bretshire Basin: Contractor shall address flooding by building a regional detention basin to detain flood overflow waters from the bayou. Contractor shall excavate 1,000,000 cubic yards of soil to construct the detention basin north of Parker Street, west of Jensen Street, south of Langley Street, and east of Shady Lane in North Houston. The construction of the detention basin will reduce peak flow waters from the bayou and reduce base flood elevations. Tidwell Drainage Improvement Project: Contractor shall address the failure of the existing storm sewer system by increasing the existing capacity by installing 2,441 linear feet of 24 inch, 54 inch, and 84 inch storm sewer and related appurtenances; approximately 3,116 linear feet of box culverts and related appurtenances; 21 manholes; 423 linear feet of 6 inch, 8 inch, and 12 inch sewer line, and related appurtenances; and shall install 11,854 square yards of pavement and related roadway work. Construction shall take place in the Glen Oaks Community on Tidwell Road from Airline Drive to McGallion Road. Improvements will allow greater volumes of water into the storm drain system, thereby mitigating flooding in the drainage basin. Yale Drainage Improvement Project: Contractor shall address the failure of the existing storm sewer system by increasing the existing capacity by removing 3,493 linear feet of 3 inch to 78 inch storm sewer and installing 2,638 linear feet of 24 inch to 78 inch storm sewer and related appurtenances. Install 4,035 linear feet of box culverts and related appurtenances and 42 manholes. Construction shall take place on Yale Street from Tidwell Road to Parker Road. Improvements will increase the capacity of the storm drain system thereby reducing flooding in the drainage basin.

DREF: Category C Portion Residential: Houston has 34,275 residential properties and 2,676 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9276 residential benefit. The term "residential properties," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 14 percent and the risk-reducing expansion was 86 percent. Combined Ratio: .89

**Location Description:**  
Halls Bayou Watershed - Houston, Texas
Activity Progress Narrative:

The City of Houston during the 1st quarter of 2011 had environmental review completed and engineering design underway for the Yale project flood and drainage project. ### Activity Description:

Contractor shall rebuild and elevate the entire length of County Road 1015, approximately 2,500 linear feet, from County Road 2165 to the dead end. Contractor shall install a culvert and ditch system capable of directing heavy runoff around and away from the roadway and adjacent residential area. Contractor shall acquire rights-of-way and easements, as necessary, resulting from the wider, elevated roadway and drainage facilities. The higher roadway elevation and increased drainage capacity will alleviate the failure to function caused by flooding caused by Hurricane Ike.

### Activity Description:

Alley between Highway 83 and Ash Street: Contractor shall purchase and install 1,100 linear feet of 24 inch diameter reinforced concrete pipe (RCP) culvert, 2 Type “A” inlets, 1 Type “C” inlet, and perform site work associated with construction. Construction shall take place in the alley between Highway 83 and Ash Street. Improvements will increase the capacity of the existing storm sewer system and reduce future flooding.

Alley Between 11th Street and 12th Street: Contractor shall purchase and install 450 linear feet of 18 inch diameter RCP Culvert, 3 Type “C” inlets and perform site work associated with construction. Construction shall take place in the alley between 11th Street and 12 Street. Improvements will increase the capacity of the existing storm sewer system and reduce future flooding.

DREF: Category C  Portion Residential: La Joya has 669 residential properties and 32 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9544 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .88

City of La Villa - 5th Street from Alamondra Avenue to Alamo Avenue

**Activity Description:**

Contractor shall install 360 linear feet of 18 inch diameter storm sewer pipe, 1 fiberglass manhole, 1 Type "C-C" inlet, and related appurtenances; and install 1,900 square yards of 1/2 inch thick asphalt and perform related site work. Construction shall take place on 5th Street between Alamondra Avenue and Alamo Avenue, the existing drainage ditch intake at the railroad track, and the roadway to the gate valve. Improvements will increase the capacity of the storm drainage system and reduce future flooding.

DREF: Category C Portion Residential: La Villa has 158 residential properties and 6 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9634 residential benefit. The term &ldquo;residential properties,&rdquo for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes.

Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent.

Combined Ratio: .88

**Activity Progress Narrative:**

The City of La Villa during the 1st quarter of 2011 had the environmental fund release underway, the engineering design work underway, and an amendment was in process to match a design for their flood and drainage facilities project.

**Activity Description:**
Grantee shall perform approximately eighty-two thousand nine hundred fifty cubic yards (82,950 c.y.) of excavation and clear and remove debris on approximately thirteen acres (13 ac.) of watershed. Grantee shall remove and replace twenty (20) existing driveway-type culverts of approximately eight hundred linear feet (800 l.f.), place one hundred sixty-five thousand nine hundred square yards (165,900 s.y.) of seeding and erosion control, and perform site work associated with the construction. Construction shall take place along Cherry Creek from north of State Highway 105 to Gaylor Creek, in the Cherry Creek watershed in north Liberty County. Improvements will increase the capacity of the drainage system and reduce future flooding.

**DREF: Category C** Portion Residential: Liberty County has 843 residential properties and 22 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9746 residential benefit. The term "residential property," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .89

DREF: Category C Portion Residential: McAllen has 1,011 residential properties and 195 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .8383 residential benefit. The term “residential properties,” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 70 percent. It was determined that the percent of improvement corresponding to base reconstruction was 30 percent and the risk-reducing expansion was 70 percent. Combined Ratio: .77

Incidental work to all components of this project shall include clearing, excavation, culvert removal and replacement, and the necessary improvements to existing intersecting streets of Magnolia Lane, Blackberry Lane, and Pecan Lane. Proposed improvements will increase the capacity of the storm sewer system and reduce flooding.

DREF: Category C  Portion Residential: Old River-Winfree has 535 residential properties and 0 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of 1.0 residential benefit. The term "residential properties," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .90

Activity Description:

Contractor shall excavate approximately 16,641 cubic yards of soil for a detention pond and install approximately 2,000 linear feet of 6 foot high chain link fence around the detention pond. Improvements will detain excess runoff and improve the function of the existing storm drainage system and reduce future flooding during peak runoff.

DREF: Category C Portion Residential: Pine Forest has 84 residential properties and 0 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of 1.0 residential benefit. The term “residential properties” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes.

Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was 100 percent. Combined Ratio: 1.0

Location Description:

**Activity Description:**
Contractor shall install a storm sewer system consisting of storm drain inlets, 793 linear feet of 24 inch to 42 inch RCP storm sewer and appurtenances, 1,450 linear feet of box culverts ranging in size from 6x4 foot, 6x5 foot, and 6x6 foot. Construction shall take place along 5th Street from North 5th Avenue to North 11th Avenue. Improvements will increase capacity of the storm sewer drainage system and reduce future flooding.

DREF: Category C Portion Residential: Texas City has 15,500 residential properties and 650 non-residential property as defined by parcel data provided by appraisal district and application information. The residential factor was divided by the total of residential and non-residential for a ratio of 0.9598 residential benefit. The term “residential properties” for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes.

Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent.

Combined Ratio: .88

Contractor shall purchase and install approximately five hundred eighty linear feet (580 l.f.) of sixty inch (60 in.) diameter storm sewer pipe, one thousand eight hundred seventy-five cubic yards (1,875 c.y.) of pipe bedding material, sixty square yards (60 s.y.) of sloped concrete, six cubic yards (6 c.y.) of concrete paving for headers and footers, two (2) inlet boxes, six hundred square yards (600 s.y.) of asphalt for pavement replacement, and related appurtenances. Proposed improvements will increase the capacity of the storm sewer and reduce flooding. Improvements will address the failure to function caused by Hurricane Ike. DREF: Category C  Portion Residential: Woodville has 206 residential properties and 26 non-residential property as defined by USGS National Land Cover Database 2001 and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .8879 residential benefit. The term &ldquo;residential properties,&rdquo for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio: .84

**Location Description:**

Construction shall take place at the intersection of Shivers Street and MLK Street to an unnamed tributary of Turkey Creek

**Activity Progress Narrative:**

The City of Woodville during the 1st quarter of 2011 had the environmental review completed, engineering completed and construction underway for their MLK & Shivers flood and drainage facilities project.

Construction shall take place throughout the City of Shoreacres. Improvements will increase the capacity of the existing storm sewer and ditches and reduce future flooding.

DREF: Category C  Portion Residential: Shoreacres has 720 residential properties and 3 non-residential property as defined by parcel data provided by appraisal district and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9959 residential benefit. The term &ldquo;residential properties,&rdquo for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes. Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent. Combined Ratio:. .90

Grantee shall purchase and install skid mounted diesel pump with a nine thousand gallon per minute (9,000 gpm) capacity and associated appurtenances. Grantee shall construct a storm proof housing and perform site work associated with construction. Construction shall take place at 1800 Upper Bay Road, Houston, Texas. Proposed improvements will increase the capacity of the storm sewer, and reduce future flooding.

DREF: Category C Portion Residential: Nassau Bay has 1,446 residential properties and 52 non-residential property as defined by parcel data provided by appraisal district and application information. The residential factor was divided by the total of residential and non-residential for a ratio of .9653 residential benefit. The term "residential properties," for this purpose, may include parcels, acres, and/or structures as available through the data sources utilized for mapping purposes.

Portion Improvement: The data gathered from applications and contract performance statements identified grossly undersized and/or nonexistent drainage facilities. Based upon project descriptions and engineering estimates, the increase in capacity above and beyond baseline reconstruction requirements was greater than 80 percent. It was determined that the percent of improvement corresponding to base reconstruction was 20 percent and the risk-reducing expansion was 80 percent.

Combined Ratio: .88
