Natural disasters damage thousands of homes and devastate the livelihoods of families every day, but you can take time now to prepare.

Know Your Risk

Sign up for your community’s emergency warning system. The Emergency Alert System (EAS) and National Oceanic and Atmospheric Administration (NOAA) Weather Radio also provide emergency alerts.

Gather Supplies

Keep in mind each person’s needs, gathering supplies for at least three days. Stock up on items such as food and water, non-perishable foods, first-aid supplies, prescriptions, pet supplies, flashlights and batteries. Don’t forget to charge electronics you may need.

Secure Documents

Remember to secure copies of important personal documents. Filing for government assistance requires documentation. Be sure to keep documents in a secure location and take them with you if you need to evacuate.

Make Your Evacuation Plan

Be familiar with the route and shelter locations. Discuss and practice drills for your evacuation plan with your family each year.

Protect Your Property

Shutter your home as needed, review your flood insurance policy (or sign up for one) and declutter drains and gutters. Most homeowner and renter insurance policies do not cover flood damage. A flood insurance policy generally does not take effect until 30 days after purchase, so be sure to maintain your policy.
